AI AVATAR GENERATOR

A screenshot of a Mac OS X desktop showing a web browser window for "voka". The browser bar shows "voka" and "OpenSea, the largest NFT mar...". The address bar says "Not Secure | 47.100.69.211". The menu bar includes "Chrome", "File", "Edit", "View", "History", "Bookmarks", "Profiles", "Tab", "Window", "Help". The system tray shows battery at 100%, signal strength, and date/time "Tue May 31 19:11".

The main content of the browser window is a dark-themed website for "VOKA". The header features a large "VOKA" logo and navigation links for "PRODUCTS", "HUB", "DEVELOPER", "ABOUT", "SIGN IN", "SIGN UP", and "DOWNLOAD".

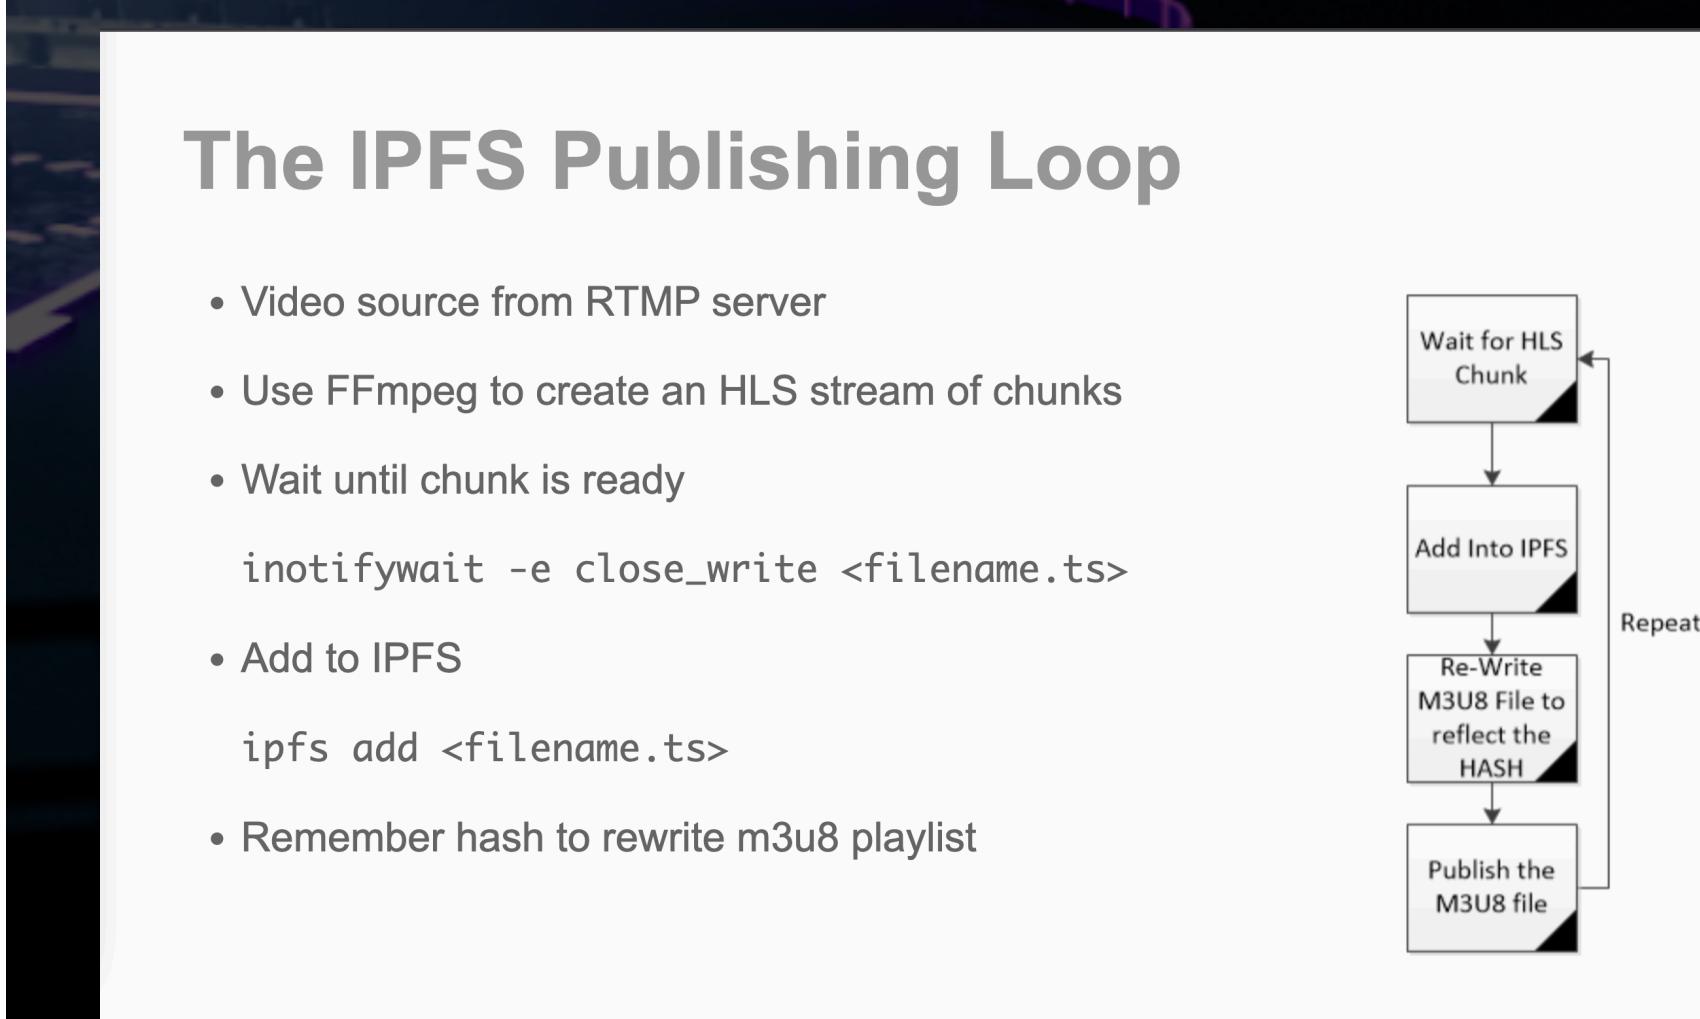

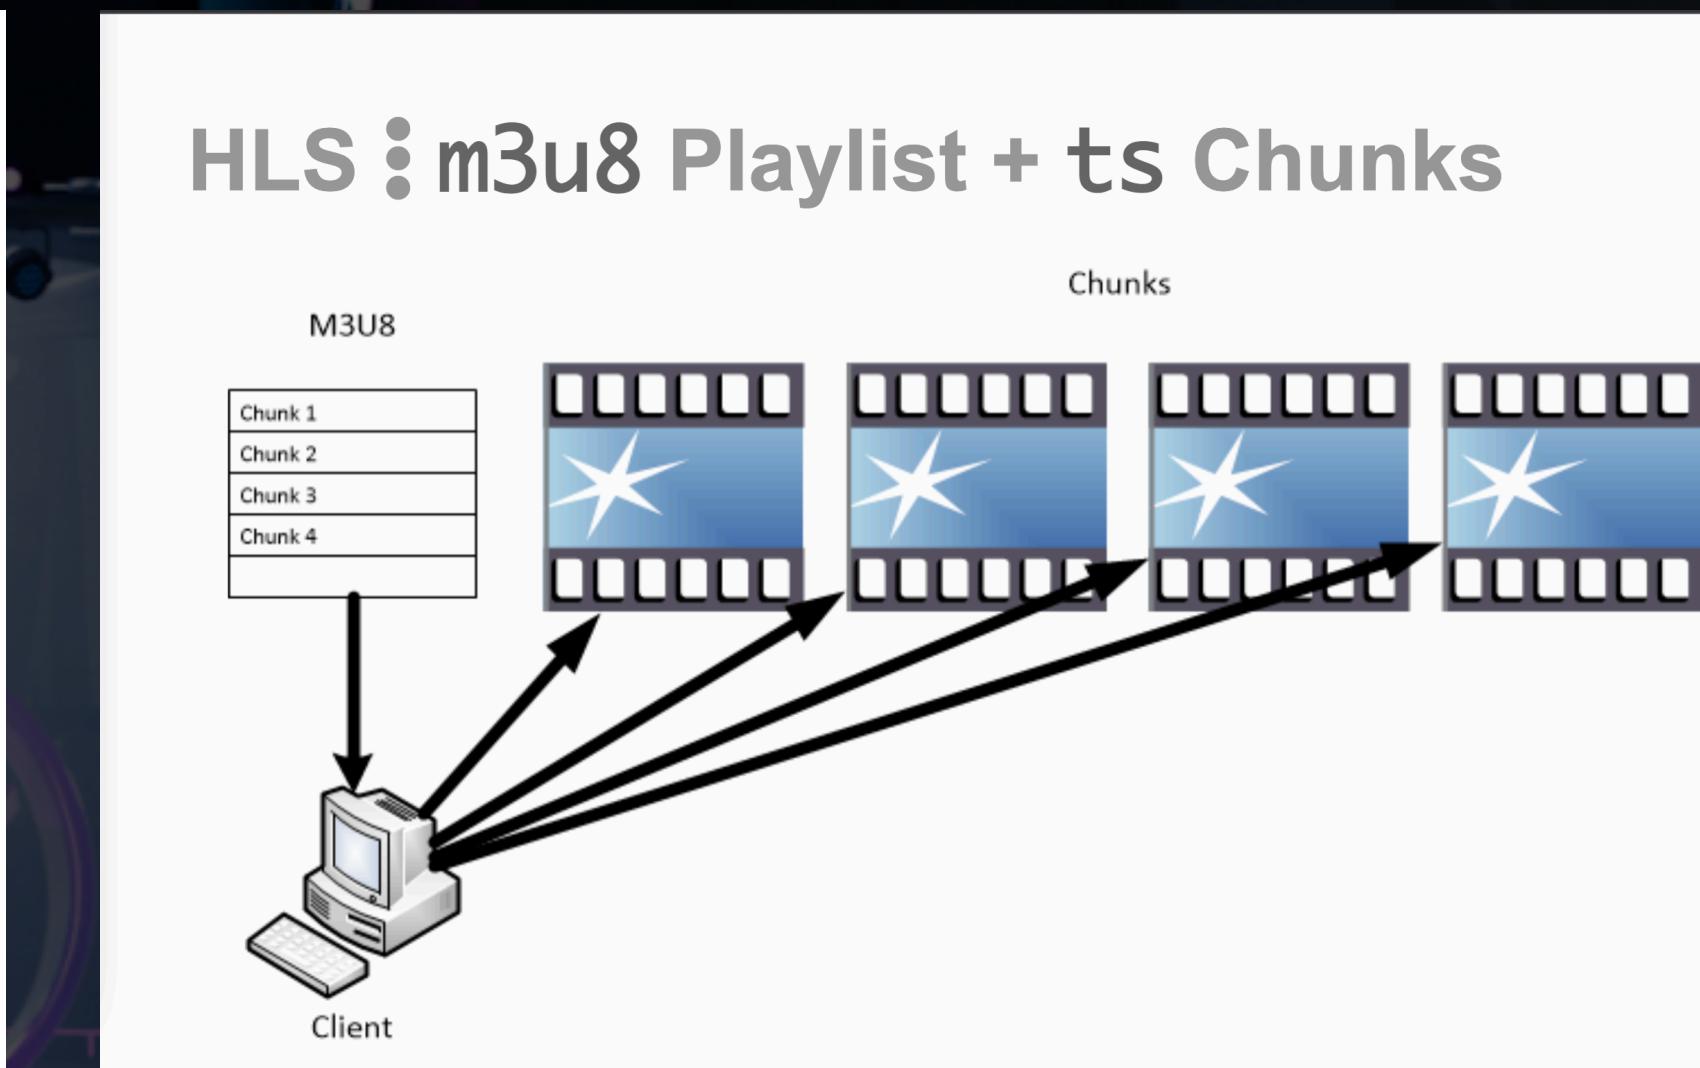

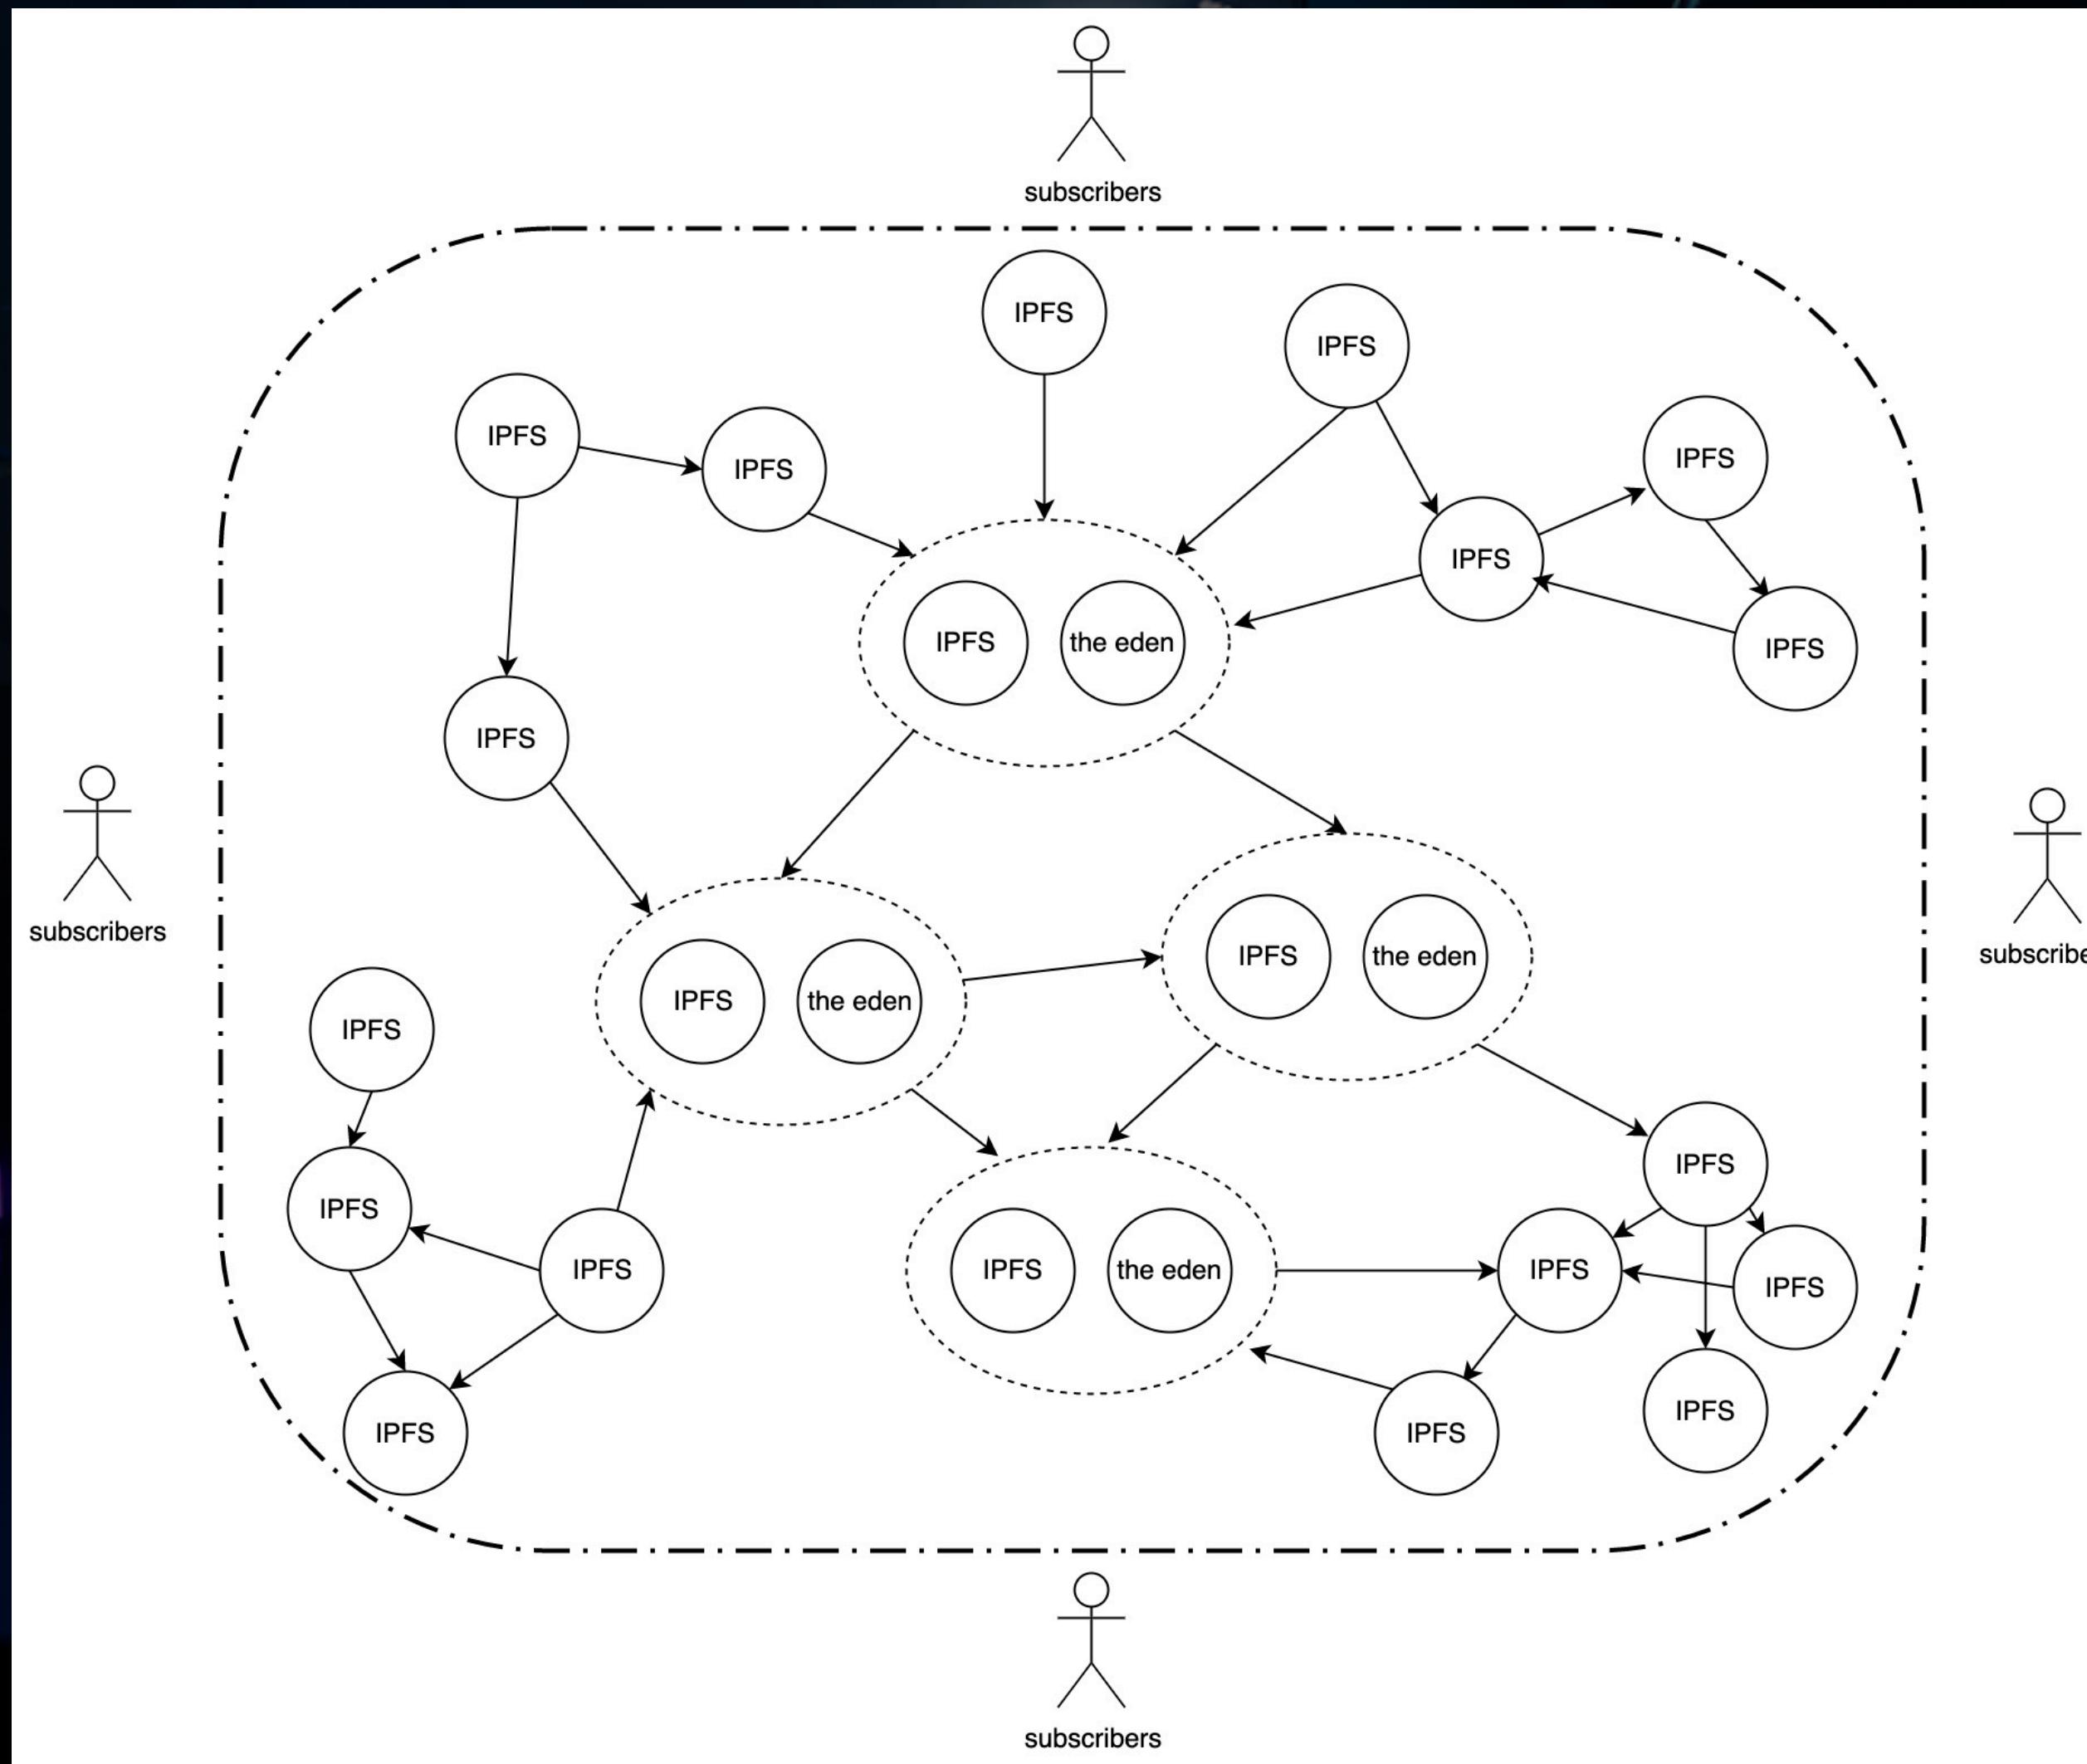

The central text on the page reads "Virtuality Overtake Kaleidoscopic Art". Below this are two buttons: "Download Products" and "GENERATE". A "VIDEO" button with a play icon is also present.

At the bottom of the page, there is a link "SCROLL TO INTRODUCTION".

On the left side of the screen, the Mac OS X Dock is visible, containing icons for various applications like Finder, Mail, Safari, and others.
